REMARKS

Currently pending in this application are claims 25-50, 52-60 and 62-77. Claims 1-24 were canceled in a prior amendment and claims 51, 61 and 78 have been canceled in this amendment.

Claim 32 has been amended to refer to a solvent instead of a diluent and to depend from claim 25.

Claim 34 has been amended to delete reference to castor oil.

Claim 38 has been amended to refer to a solvent instead of a diluent and to depend from claim 34.

Claim 49 has been amended to refer to a solvent instead of a diluent and to depend from claim 43.

Claim 52 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 59 has been amended to refer to a solvent instead of a diluent and to depend from claim 52.

Claim 62 has been amended to change addition to additive, correcting an obvious typographical error and to delete reference to castor oil.

Claim 66 has been amended to refer to a solvent instead of a diluent and to depend from claim 62.

Claim 70 has been amended to change addition to additive, correcting an obvious typographical error.

Claim 76 has been amended to refer to a solvent instead of a diluent.

The examiner has provisionally rejected the pending claims under the judicially created doctrine of obvious-type double patenting over the pending claims in applications

10/084,236, 10/084,579, 10/084,601, 10/084,833, 10/084,237 and 10/084,831.

Accompanying this amendment is a terminal disclaimer limiting the term of any patent that may issue from this application to the term of the first to expire of any patent that may issue from the cited applications. The filing of the terminal disclaimer renders the rejection moot.

The examiner has rejected claims 32, 38, 49, 59, 66 and 76 under 35 U.S.C. §112, first paragraph as failing to comply with the written description requirement. Specifically the examiner noted that the specification did not support defining certain compounds recited in the claims as “diluent” when the specification defined them as solvents. The claims have been amended to define the compounds as solvents and to change their dependency to the preceding independent claim.

The examiner next rejected claims 28, 45, 46, 51, 55, 56, 61, 62, 70, 72, 73 and 78 under 35 U.S.C. §112 as indefinite for failing to particularly point out and distinctly claim the subject matter which the applicant regards as the invention.

The examiner rejected claims 28, 45, 55, and 72 on the grounds that the examiner did not see the distinction between the plant oil extracts derived from grain and the vegetable and nut plant oils. The examiner stated the opinion that vegetables and nuts are also grains. Applicants respectfully traverse this rejection. As defined by Webster’s, a grain is a seed of fruit from a cereal or grass. Merriam-Webster’s Collegiate Dictionary, p. 543 (11th Ed. 2003) (attached). A vegetable on the other hand is a herbaceous plant and a nut is a hard shell dry fruit or seed. Id at 853, 1386. While all of these are plants, they are different varieties and the differences in the oil extracts and oils would be apparent to one skilled in the art. In addition, plant oil extracts are generally obtained from chlorophyll containing parts of the plant (see, e.g. paragraphs 59 and 60), whereas vegetable oils are generally extracted from the seed, nut or fruit (see, e.g., paragraphs 75 and 76). Thus, applicant respectfully submits that the two groups of materials are distinct the claims are not indefinite.

The examiner rejected claims 46 and 51 as substantial duplicates. Claim 51 has been canceled rendering the rejection moot.

The examiner rejected claims 52, 62 and 70 noting that the term “addition” should read “additive.” The claims have been amended to change the term “addition” to “additive”.

The examiner rejected claims 56 and 61 as substantial duplicates. Claim 61 has been canceled rendering the rejection moot.

The examiner rejected claims 73 and 78 as substantial duplicates. Claim 78 has been canceled rendering the rejection moot.

The examiner has rejected claims 34, 37-40, 62 and 65-68 under 35 U.S.C. §102(b) as anticipated by U.S. Patent 5,862,369 to Jordan. The examiner noted that Jordan teaches a fuel composition that contains beta-carotene (carotenoid), chlorophyll (hydrophobic plant extract) and ethoxylated castor oil (thermal stabilizer) as well as cetane improvers. The composition may be diluted with various solvents including gasoline, toluene, diesel fuel and alcohols. Applicants respectfully submit that the claims as amended are not anticipated by Jordan.

As noted above, the Markush group in claims 34 and 62 that define the thermal stabilizer does not include castor oil. None of the other oils recited in the claims are taught or recited in Jordan. Thus Jordan can not anticipate the claims. Claims 37-40 depend from claim 34 and claims 65-68 depend from claim 62. Since Jordan does not anticipate the independent claims it can not anticipate the dependent claims.

CONCLUSIONS

Applicant submits that the pending claims are free of the art and are in condition for allowance.

Applicant believes there is no fee due with this response. However, if fees are due, please charge our Deposit Account No. 06-2375, under Order No. P02917US7 (AKA ORYXE.013A) from which the undersigned is authorized to draw.
